

SAFETY DATA SHEET BLUE GEE | EPOXY RESIN EPIKOTE™ RESIN 816

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Regulation (EU) No. 453/2010

Page: 1/22

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier	
Product name SDS Number	 EPIKOTE[™] Resin 816 BULK 0359300
Product type	: Epoxy Resin
1.2 Relevant identified uses of the	substance or mixture and uses advised against
Product use	Epoxy Resin Systems
1.3 Details of the supplier of the sa Manufacturer/Supplier/Impor ter	Afety data sheet : Hexion B.V. Seattleweg 17 3195 ND Pernis - Rotterdam The Netherlands
Contact person	: 4information@hexion.com
Telephone 1.4	: General information +31 6 52 511079
Emergency telephone number Supplier Telephone number	: CARECHEM24 : +44 (0) 1235 239 670

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Skin Corr./Irrit. 2 H315 Eye Dam./Irrit. 2 H319 Skin Sens. 1 H317 Muta. 2 H341 Aquatic Chronic 2 H411

Classification according to Directive 1999/45/EC [DPD]

Classification	:	Muta.Cat.3, R68 Xi, R36/38 R43 N, R51/53
Physical/chemical hazards Human health hazards Environmental hazards	:	Not applicable. Possible risk of irreversible effects. Irritating to eyes and skin. May cause sensitization by skin contact. Toxic to aquatic organisms, may cause long-term adverse effects in
w	-	the aquatic environment.

See Section 16 for the full text of the R phrases or H statements declared above.

2.2 Label elements		
Hazard pictograms	:	
Signal word Hazard statements	:	Warning Causes serious eye irritation. Causes skin irritation. May cause an allergic skin reaction. Suspected of causing genetic defects. Toxic to aquatic life with long lasting effects.
<u>Precautionary statements</u> Prevention	P	Obtain special instructions before use. Wear protective gloves. Wear eye or face protection. Avoid release to the environment.
Response	:	IF exposed or concerned: Get medical attention. IF IN EYES: Rinse cautiously with water for several minutes.
Storage	:	Store locked up.
Disposal	:	Dispose of contents and container in accordance with all local, regional, national and international regulations.
Hazardous ingredients	:	reaction product: bisphenol-A-(epichlorhydrin); epoxy resin (number average molecular weight ≤ 700) 2,3-epoxypropyl neodecanoate
Supplemental label elements	:	Not applicable.
2.3 Other hazards		
Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII	:	Not applicable.

Version: 3.0 Date of issue/Date of revision: 05/05/2015 Date of previous issue: 02/01/2013

Page: 2/22

Page: 3/22

Substance meets the criteria for : No vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

Not applicable.

Other hazards which do not : None known. result in classification

SECTION 3: Composition/information on ingredients

Substance/mixture

Mixture

:

Product/ingredient name	Identifiers	% by weight	<u>Classi</u> 67/548/EEC	Туре

Type

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

See Section 16 for the full text of the R phrases or H statements declared above.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4: First aid measures

4.1 Description of first aid measures

Eye contact	:	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.
Inhalation	:	Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Regulation (EU) No. 453/2010 EPIKOTETM Resin 816 Page: 4/22

Skin contact	:	Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Ingestion	:	Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Protection of first aid personnel	:	No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

4.2 Most important symptoms and effects, both acute and delayed

Potential acute health effects

Eye contact Inhalation Skin contact Ingestion <u>Over-exposure signs/symptoms</u> Eye contact	p	Causes serious eye irritation. No known significant effects or critical hazards. Causes skin irritation. May cause an allergic skin reaction. Irritating to mouth, throat and stomach. Adverse symptoms may include the following: pain or irritation watering redness		
Inhalation	:	No specific data.		
Skin contact	:	Adverse symptoms may include the following: irritation redness		
Ingestion	:	No specific data.		
4.3 Indication of any immediate medical attention and special treatment needed				
Notes to physician Specific treatments	:	Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. No specific treatment.		

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media	:	Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	:	None known.

5.2 Special hazards arising from the substance or mixture

Hazards from the substance or mixture Hazardous thermal decomposition products	:	In a fire or if heated, a pressure increase will occur and the container may burst. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. Decomposition products may include the following materials: carbon dioxide carbon monoxide halogenated compounds
5.3 Advice for firefighters		
Special protective actions for fire-fighters	:	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	:	Fire-fighters should wear appropriate protective equipment and self- contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	Р :	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment. If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
6.2 Environmental precautions	:	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.
6.3 Methods and material for con	tainme	nt and cleaning up
Small spill	:	Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water- insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	:	Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses,

basements or confined areas. Wash spillages into an effluent

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Regulation (EU) No. 453/2010 EPIKOTETM Resin 816 Page: 6/22

treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product.
 6.4 Reference to other sections

 See Section 1 for emergency contact information. See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Protective measures :	Put on appropriate personal protective equipment (see section 8 of SDS). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Avoid release to the environment. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
Advice on general occupational	Eating, drinking and smoking should be prohibited in areas where
hygiene	this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10 of SDS) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

7.3 Specific end use(s)

Recommendations	:	Not available
Industrial sector specific	:	Not available
solutions		

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Occupational exposure limits

No exposure limit value known.		
Recommended monitoring	:	If
procedures		W

If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

PNEC Summary	PNEC Summary : Not available				

Derived No-Effect Levels' (DNEL's) and Predicted No-Effect Concentrations' (PNEC's)

Explanatory note:

REACH requires manufacturers and importers to establish and report 'Derived No-Effect Levels' (DNEL's) for humans by inhalation, ingestion and dermal routes of exposure and 'Predicted No-Effect Concentrations' (PNEC's) for environmental exposure. DNEL's and PNEC's are established by the registrant without an official consultation process, and are not intended to be directly used for setting workplace or general population exposure limits. They are primarily used as input values in running Quantitative Risk Assessment models (like the ECETOC-TRA model).

Due to differences in calculation methodology the DNEL will tend to be lower (sometimes significantly) than any corresponding health-based OEL for that chemical substance. Further although DNEL's (and PNEC's) are an indication for setting risk reduction measures, it should be recognized that these limits do not have the same regulatory application as officially endorsed governmental OEL's.

8.2 Exposure controls

Appropriate engineering controls	:	If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.
Individual protection measures		
Hygiene measures	:	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Regulation (EU) No. 453/2010 EPIKOTETM Resin 816 Page: 10/22

Eye/face protection :	and safety showers are close to the workstation location. Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.
Skin protection	
Hand protection :	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
Body protection :	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection :	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection : Environmental exposure controls :	Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

SECTION 10: Stability and reactivity

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure		
reaction product: bisphenol-A-(epichlorhydrin); epoxy resin (number average molecular weight \leq 700)						
	LD50 Oral	Rat	11,400 mg/kg	-		
Remarks - Oral:	Not acutely toxic in multiple mouse and rat studies, LD50 > 2000 mg/kg of body weight.					
Remarks - Inhalation:		Due to the very low vapor pressure, saturated atmosphere $= 0.008$ ppb, meaningful acute inhalation studies could not be conducted.				
Remarks - Dermal:	In a rat OECD no. 402 study the dermal LD50 was > 2000 mg/kg. In multiple rabbit acute dermal studies the LD50 was > 2000 mg/kg. One rabbit study reported an LD50 value of 23 grams/kg.					
	LD50 Dermal	Rat	2,000 mg/kg	-		
2,3-epoxypropyl neodecanoa	ite					
	LD50 Oral	Rat	9,600 mg/kg	-		
Remarks - Oral:	Male and female Wistar rats were treated by oral gavage with approximately 970 g/kg 2,3-epoxypropyl neodecanoate/kg of body weight. Lethargy was the only clinical finding made during the study. One mortality was observed on day three					

	of the study. Therefore, the acute oral LD50 value for this study is >970 g/kg of						
	body weight.	body weight.					
Remarks - Inhalation:	The acute 4 hr inhalation LC50 value of 2,3 -epoxypropyl neodecanoate to rats						
	was > 240 mg/m3	(26 ppm).					
	LD50 Dermal	LD50 Dermal Rat 3,800 mg/kg -

Sensitization

Product/ingredient name Route of exposure		Species	Result
reaction product: bisphenol-	Skin	-	-
A-(epichlorhydrin); epoxy			
resin (number average			

molecular weight \leq 700)						
Remarl	s: In an OECD No. 429 mouse LLNA study the estimated EC3 was a					
	concentration of 5.7% suggesting that BADGE is a moderate skin sensitizer in					
	this test system. In an OECD No. 406 guinea pig Maximization study BADGE					
	induced positive dermal reaction in 100% of the test animals at a 50%					
	concentration challenge dose. Therefore, BADGE is an "Extreme" skin					
	sensitizer under the conditions of this study. BADGE was also positive for					
	skin sensitization in an OECD No. 406 guinea pig Buehler method study.					
2,3-epoxypropyl	Skin					
neodecanoate						
Remarl	s: 2,3-Epoxypropyl neodecanoate was evaluated for dermal sensitizing potential					
	in four independent guinea pig Maximization studies following the methods					
	established by Magnusson and Kligman (Magnusson, B. and Kligman, A. M.,					
	1969. The identification of contact allergens by animal assay. The guinea—pig					
	maximization test. J. Invest. Derm., 52, 268-276). One of the Maximization					
	studies was conducted according to the current O.E.C.D. Testing Guideline					
	406, "Skin Sensitization" protocol under the GLP regulations. The level of					
	positive skin reactions observed in challenged test guinea pigs ranged from					
	45% to 95%. Therefore, 2,3-epoxypropyl neodecanoate is a moderate to					
	extreme dermal sensitizer in the guinea pig Maximization test.

Conclusion/Summary	: Not available		

12.2 Persistence and degradability

Product/ingredient name	Test	Result	Dose	Inoculum		
reaction product: bisphenol-A- (epichlorhydrin); epoxy resin (number average molecular weight \leq 700)		dfele	eme	nt		
Remarks:	The level of biodegradation in an "enhanced" OECD 301F study was 5% within the 28 day contact period. Biodegradation reached 6 - 12 % after 28 days of contact in an OECD test guideline no. 301B study. Therefore, BADGE is not readily biodegradable under the conditions of the studies.					
2,3-epoxypropyl neodecanoate		-				
Remarks:	Based on the results of two O.E.C.D. Test Guideline readily biodegradation studies, 2,3 -epoxypropyl neodecanoate was biodegraded approximately 7 - 11%. Therefore, 2,3 -epoxypropyl neodecanoate is not readily biodegradable. However, when 2,3 - epoxypropyl neodecanoate was evaluated in an O.E.C.D. Testing Guideline 302 A, "Inherent Biodegradability: Modified SCAS Test" the level of biodegradation reached 68% +/- 5% over days 22 to 36 of the study. Therefore, 2,3 -epoxypropyl neodecanoate is both inherently and ulimately biodegradable under the conditions and criteria of O.E.C.D. Testing Guideline 302 A.					
Conclusion/Summary	: 1	Not available				

12.3 Bioaccumulative potential

Not available

12.3 Bioaccumulative potential

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Methods of disposal Hazardous waste	: P :	The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. The classification of the product may meet the criteria for a hazardous waste.
Packaging		
Methods of disposal	:	The generation of waste should be avoided or minimized wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.
Special precautions	:	This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

SECTION 14: Transport information

Emergency Contact Number (Office Hours)	+44 1274 267346		
Sds No.	11322		
SECTION 2: Hazards identification	ation		
2.1. Classification of the subst	ance or mixture		
Classification			
Physical hazards	Not Classified		
Health hazards	Acute Tox. 2 - H330 Skin Corr. 1B - H314 Eye Dam. 1 - H318 Skin S H361f STOT SE 3 - H335	Sens. 1 - H317 Repr. 2 -	
Environmental hazards	Aquatic Chronic 2 - H411		
Classification (67/548/EEC or 1999/45/EC)	T+; R26. C; R34. Xi; R37. Repr. Cat. 3 R62. N; R51/53. R43		

2.2. Label elements

Pictogram

Signal word	Danger
Hazard statements	 H314 Causes severe skin burns and eye damage. H317 May cause an allergic skin reaction. H330 Fatal if inhaled. H335 May cause respiratory irritation. H361f Suspected of damaging fertility. H411 Toxic to aquatic life with long lasting effects.
Precautionary statements	 P201 Obtain special instructions before use. P202 Do not handle until all safety precautions have been read and understood. P260 Do not breathe vapour/spray. P271 Use only outdoors or in a well-ventilated area. P272 Contaminated work clothing should not be allowed out of the workplace. P273 Avoid release to the environment. P280 Wear protective gloves/protective clothing/eye protection/face protection. P284 [In case of inadequate ventilation] wear respiratory protection. P301+P330+P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing. P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P310 Immediately call a POISON CENTER/doctor. P333+P313 If skin irritation or rash occurs: Get medical advice/attention. P362+P364 Take off contaminated clothing and wash it before reuse. P391 Collect spillage. P403+P233 Store in a well-ventilated place. Keep container tightly closed. P405 Store locked up. P501 Dispose of contents/container in accordance with national regulations.
Contains	4,4'-ISOPROPYLIDENEDIPHENOL, DIETHYLENETRIAMINE

2.3. Other hazards

This product does not contain any substances classified as PBT or vPvB.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

DIETHYLENETRIAMINE		10-30%

	hrases and Hazard Statements are Displayed in Se	
Composition comments	The data shown are in accordance with the	a latest EC Directives.
SECTION 4: First aid m	easures	
4.1. Description of first a	aid measures	
General information	Toxic to Reproduction Category 3. Possible	e risk of adverse reproductive effects.
Inhalation		warm and at rest in a position comfortable for
		erly trained personnel may assist affected person
	by administering oxygen. Get medical atter	ntion immediately.
ngestion		lenty of water to drink. Give milk instead of water
		outh to an unconscious person. Do not induce
	lungs. Get medical attention immediately.	Id be kept low so that vomit does not enter the
Skin contact	immediately.	ediately with plenty of water. Get medical attentio
Eye contact	Rinse immediately with plenty of water. Col	ntinue to rinse for at least 15 minutes. May cause
		ly irrigated. Get medical attention immediately.
	Continue to rinse.	
I.2. Most important sym	ptoms and effects, both acute and delayed	
nhalation	Very toxic by inhalation. Irritating to respira	tory system.
ngestion	May cause chemical burns in mouth, oesop	phagus and stomach. Harmful if swallowed.
Skin contact	Chemical burns. Harmful in contact with sk	in. May cause sensitisation by skin contact.
Eye contact	Chemical burns.	
4.3. Indication of any im	mediate medical attention and special treatment ne	beded
Notes for the doctor	Treat symptomatically.	
SECTION 5: Firefighting) measures	
5.1. Extinguishing media	a	
Suitable extinguishing m	nedia Extinguish with alcohol-resistant foam, carb	oon dioxide or dry powder.
5.2. Special hazards ari	sing from the substance or mixture	
Specific hazards		O). Carbon dioxide (CO2). Under certain conditior
		cominan are parainagonia in animal studios. Tavia

gases or vapours. Nitric acid (HNO3). Nitrous gases (NOx). Aldehydes.

the substance can form nitrosamines. nitrosamines are carcinogenic in animal studies. Toxic

5.3. Advice for firefighters		
Protective actions during firefighting	Control run-off water by containing and keeping it out of sewers and watercourses.	
Special protective equipment for firefighters	Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing.	
SECTION 6: Accidental releas	e measures	
6.1. Personal precautions, pro	tective equipment and emergency procedures	
Personal precautions	Wear protective clothing as described in Section 8 of this safety data sheet.	
6.2. Environmental precaution	S	
Environmental precautions	Spillages or uncontrolled discharges into watercourses must be reported immediately to the Environmental Agency or other appropriate regulatory body.	
6.3. Methods and material for	containment and cleaning up	
Methods for cleaning up	Absorb spillage with inert, damp, non-combustible material. Flush contaminated area with plenty of water. Collect and place in suitable waste disposal containers and seal securely. For waste disposal, see Section 13.	
6.4. Reference to other section	1S	
Reference to other sections	Wear protective clothing as described in Section 8 of this safety data sheet.	
SECTION 7: Handling and sto	rage	
7.1. Precautions for safe hand		
Usage precautions	Avoid contact with skin and eyes. Avoid the following conditions: Inorganic nitrites. Avoid inhalation of vapours and spray/mists. Provide adequate ventilation.	
7.2. Conditions for safe storag	e, including any incompatibilities	
Storage precautions	Keep container tightly closed. Store in tightly-closed, original container in a dry, cool and well- ventilated place. Store away from the following materials: Acids.	
Storage class	Corrosive storage.	
7.3. Specific end use(s)		
Specific end use(s)	The identified uses for this product are detailed in Section 1.2.	
SECTION 8: Exposure Contro	Is/personal protection	
8.1. Control parameters		
Occupational exposure limits DIETHYLENETRIAMINE		
Long-term exposure limit (8-hour TWA): WEL 1 ppm(Sk) 4.3 mg/m3(Sk) Short-term exposure limit (15-minute): WEL		
4,4'-ISOPROPYLIDENEDIPHENOL

8.2. Exposure controls

Protective equipment

Appropriate engineering

Eye/face protection

Other skin and body

protection

Hand protection

controls

Provide adequate general and local exhaust ventilation. Observe any occupational exposure limits for the product or ingredients.

Wear tight-fitting, chemical splash goggles or face shield. EN 166

Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. Neoprene. EN 374

Wear appropriate clothing to prevent any possibility of skin contact. Wear rubber apron. Wear rubber footwear.

Hygiene measures	Provide eyewash station and safety shower. Promptly remove any clothing that becomes contaminated. Wash hands after handling. Wash hands at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke.
Respiratory protection	When spraying, wear a suitable supplied-air respirator. If ventilation is inadequate, suitable respiratory protection must be worn. EN 136/140/145/143/149

SECTION 9: Physical and Chemical Properties

9.1. Information on basic physical and chemical properties

Appearance	Liquid.
Colour	Amber.
Odour	Ammonia.
Odour threshold	Data lacking.
pН	pH (concentrated solution): >7
Melting point	Data lacking.
Initial boiling point and range	> 200°C @
Flash point	102.78°C
Upper/lower flammability or explosive limits	Data lacking.
Vapour pressure	<0.10 mm Hg @ °C Data lacking.
Vapour density	Data lacking.
Relative density	1.03 @ °C
Solubility(ies)	0.14 @ °C Slightly soluble in water.
Partition coefficient	Not available.
Auto-ignition temperature	Data lacking.
Decomposition Temperature	Data lacking.
Viscosity	Data lacking.
Explosive properties	Data lacking.
Oxidising properties	Not available.
9.2. Other information	
Other information	Not available.
SECTION 10: Stability and rea	activity

10.1. Reactivity

Reactivity

The following materials may react with the product: Sodium. Calcium. Zinc. Under certain conditions the substance can form nitrosamines. nitrosamines are carcinogenic in animal studies.

10.2. Chemical stability

Stability

Stable at normal ambient temperatures and when used as recommended.

10.3. Possibility of hazardous reactions

Possibility of hazardous reactions	Not determined.
10.4. Conditions to avoid	
Conditions to avoid	Avoid excessive heat for prolonged periods of time.
10.5. Incompatible materials	
Materials to avoid	Chemically-active metals. Strong oxidising agents. Acids - organic. Strong mineral acids. Inorganic nitrites.
10.6. Hazardous decompositio	on products
Hazardous decomposition products	Oxides of carbon. Thermal decomposition or combustion may liberate carbon oxides and other toxic gases or vapours. Ammonia or amines. Carbon monoxide (CO). Carbon dioxide (CO2). Nitric acid (HNO3). Nitrous gases (NOx). Aldehydes.
SECTION 11: Toxicological in	formation
11.1. Information on toxicolog	ical effects
Acute toxicity - oral Acute toxicity oral (LD₅₀ mg/kg)	1,080.0
Species	Rat
ATE oral (mg/kg)	4,153.85
Acute toxicity - dermal Acute toxicity dermal (LD ₅₀ mg/kg)	Rat 4,153.85 1,090.0 Defense ent
Species	Rabbit
ATE dermal (mg/kg)	4,192.31
Acute toxicity - inhalation ATE inhalation (dusts/mists mg/l)	0.26923077
Skin corrosion/irritation Animal data	Corrosive
Serious eye damage/irritation Serious eye damage/irritation	Corrosive
Skin sensitisation Skin sensitisation	Sensitising.
Germ cell mutagenicity Genotoxicity - in vitro	Inconclusive data.
Carcinogenicity Carcinogenicity	Data lacking.
Reproductive toxicity Reproductive toxicity - fertility	Suspected of damaging fertility.
Specific target organ toxicity - STOT - single exposure	single exposure Data lacking.

Specific target organ toxicity - repeated exposure			
STOT - repeated exposure	Data lacking.		
Aspiration hazard			
Aspiration hazard	Not available.		
Inhalation	Very toxic by inhalation. Irritating to respiratory system.		
Ingestion	Harmful if swallowed. May cause chemical burns in mouth, oesophagus and stomach.		
Skin contact	Harmful in contact with skin. Causes burns. May cause nausea, headache, dizziness and intoxication. May cause sensitisation by skin contact.		
Eye contact	Causes burns.		
Acute and chronic health hazards	Contains a substance/a group of substances which may damage fertility.		
Toxicological information on ingradianta			

Toxicological information on ingredients.

DIETHYLENETRIAMINE

Acute toxicity - oral	
Acute toxicity oral (LD₅₀ mg/kg)	1,080.0
Species	Rat
ATE oral (mg/kg)	Rat 1,080.0 Felement
Acute toxicity - dermal	
Acute to <mark>xicity dermal (LD₅</mark> mg/kg)	1,090.0
Species	Rabbit
ATE dermal (mg/kg)	1,090.0
Acute toxicity - inhalation	
Acute toxicity inhalation (LC∞ dust/mist mg/l)	0.07
Species	Rat
ATE inhalation (dusts/mists mg/l)	0.07
Skin corrosion/irritation	
Animal data	Data lacking.
Serious eye damage/irritation	
Serious eye damage/irritation	Data lacking.
Skin sensitisation	
Skin sensitisation	Data lacking.
Germ cell mutagenicity	

Genotoxicity - in vitro	Data lacking.
Carcinogenicity	
Carcinogenicity	Data lacking.
Reproductive toxicity	
Reproductive toxicity - fertility	Data lacking.
Specific target organ toxicit	y - single exposure
STOT - single exposure	Data lacking.
Specific target organ toxicit	y - repeated exposure
STOT - repeated exposure	Data lacking.
Inhalation	Fatal if inhaled. May cause respiratory system irritation. May cause damage to mucous membranes in nose, throat, lungs and bronchial system.
Ingestion	Liquid irritates mucous membranes and may cause abdominal pain if swallowed. Irritating. Symptoms following overexposure may include the following: Dizziness. Nausea, vomiting. Causes burns.
Skin contact	Causes burns. May cause sensitisation by skin contact.
Eye contact Acute toxicity - oral	Causes burns. Risk of serious damage to eyes. <u>4,4'-ISOPROPYLIDENEDIPHENOL</u>
Acute toxicity oral (LD₅₀ mg/kg)	3,250.0
Species	Rat
ATE oral (mg/kg)	3,250.0
Acute toxicity - dermal	
Acute toxicity dermal (LD₅ mg/kg)	3,000.0
Species	Rabbit
Skin corrosion/irritation	
Animal data	Not irritating.
Serious eye damage/irritation	
Serious eye damage/irritation	Irritating.
Skin sensitisation	
Skin sensitisation	Not sensitising.
Germ cell mutagenicity	
Genotoxicity - in vitro	This substance has no evidence of mutagenic properties.

	Carcinogenicity	
	Carcinogenicity	Data lacking.
	Reproductive toxicity	
	Reproductive toxicity - fertility	Multi-generation study - NOAEL 50 mg/kg/day, Oral,
	Specific target organ toxicit	y - single exposure
	STOT - single exposure	Data lacking.
	Specific target organ toxicit	y - repeated exposure
	STOT - repeated exposure	Dose level: 500 - 600 mg/kg, Oral,
	Target organs	Kidneys Liver
	Aspiration hazard	
	Aspiration hazard	Not applicable.
	Inhalation	Irritating to respiratory system.
	Ingestion	May cause stomach pain or vomiting.
	Skin contact	May cause sensitisation by skin contact.
	Eye contact	Causes serious eye damage.
	Acute and chronic health hazards	Contains a substance/a group of substances which may damage fertility.
SECTION 4		
SECTION	2: Ecological Information	
Ecotoxicity	There ar	e no data on the ecotoxicity of this product.
Ecological in	nformation on ingredients.	
		DIETHYLENETRIAMINE
	Ecotoxicity	The product components are not classified as environmentally hazardous. However, large or frequent spills may have hazardous effects on the environment.
		4,4'-ISOPROPYLIDENEDIPHENOL
	Ecotoxicity	Toxic to aquatic life with long lasting effects.
12.1. Toxicit	y	
Toxicity	The proc	luct contains a substance which is harmful to aquatic organisms.
Ecological information on ingredients.		
		DIETHYLENETRIAMINE
	Toxicity	Not considered toxic to fish.
	Acute toxicity - fish	LC₅₀, 96 hours: 175 - 332 mg/l, Fish

Acute toxicity - aquatic	EC₅₀, 48 hours: 16 - 65 mg/l, Daphnia magna
invertebrates	

Acute toxicity - aquatic IC₅₀, 72 hours: 346 mg/l, Algae plants

4,4'-ISOPROPYLIDENEDIPHENOL

Acute toxicity - fish	LC50, 96 hours, 96 hours: 4.6 mg/l, Pimephales promelas (Fat-head Minnow)
Acute toxicity - aquatic invertebrates	EC₅₀, 48 hours, 48 hours: 7.75 mg/l, Freshwater invertebrates

Chronic toxicity - fish early NOEC, : 0.016 mg/l, Pimephales promelas (Fat-head Minnow) **life stage**

12.2. Persistence and degradability

Persistence and degradability There are no data on the degradability of this product.

Ecological information on ingredients.

DIETHYLENETRIAMINE

Persistence and degradability Persistence and degradability Biodegradation	The product is readily biodegradable. 4,4'-ISOPROPYLIDENEDIPHENOL The substance is readily biodegradable. - Degradation (%) 76: > 28 days OECD 301F
12.3. Bioaccumulative potential	
Bioaccumulative potential No dat	a available on bioaccumulation.
Partition coefficient Not av	ailable.
Ecological information on ingredients.	
	DIETHYLENETRIAMINE
Bioaccumulative potentia	I The product does not contain any substances expected to be bioaccumulating.
Partition coefficient	: 1.3
	4,4'-ISOPROPYLIDENEDIPHENOL
Bioaccumulative potentia	I The product does not contain any substances expected to be bioaccumulating.
Partition coefficient	log Pow: 3.3
12.4. Mobility in soil	
Mobility The pr	oduct has poor water-solubility.
Ecological information on ingredients.	

DIETHYLENETRIAMINE

Mobility	The product is soluble in water.	
····· ·	4,4'-ISOPROPYLIDENEDIPHENOL	
	4,4-ISOFROFTLIDENEDIFHENOL	
Mobility	The product is insoluble in water.	
12.5. Results of PBT and vPvB	Bassessment	
Results of PBT and vPvB assessment	No data available.	
Ecological information on ingre	adients.	
	DIETHYLENETRIAMINE	
Results of PBT ar assessment	nd vPvB This substance is not classified as PBT or vPvB according to current EU criteria.	
	4,4'-ISOPROPYLIDENEDIPHENOL	
Results of PBT ar assessment		
12.6. Other adverse effects Other adverse effects Not determined.		
Ecological information on ingre		
Other adverse eff	ects Not determined.	
	4,4'-ISOPROPYLIDENEDIPHENOL	
Other adverse eff	ects None known.	
SECTION 13: Disposal conside	erations	
13.1. Waste treatment methods	S	
General information	Waste is classified as hazardous waste. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.	
Disposal methods	Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.	
SECTION 14: Transport information		
General	Wear protective clothing as described in Section 8 of this safety data sheet.	
14.1. UN number		
UN No. (ADR/RID)	2079	
UN No. (IMDG)	2079	
UN No. (ICAO)	2079	

14.2. UN proper shipping name	9
Proper shipping name (ADR/RID)	DIETHYLENETRIAMINE
Proper shipping name (IMDG)	DIETHYLENETRIAMINE
Proper shipping name (ICAO)	DIETHYLENETRIAMINE
Proper shipping name (ADN)	DIETHYLENETRIAMINE
14.3. Transport hazard class(e	s)
ADR/RID class	8
ADR/RID subsidiary risk	
ADR/RID label	8
IMDG class	8
IMDG subsidiary risk	
ICAO class/division	8
ICAO subsidiary risk	
Transport labels	-+
8	pdfelement
14.4. Packing group	
ADR/RID packing group	
IMDG packing group	II
ICAO packing group	II
14.5. Environmental hazards	
Environmentally hazardous su	bstance/marine pollutant
No.	
14.6. Special precautions for u	ser
EmS	F-A, S-B
Emergency Action Code	2X
Hazard Identification Number (ADR/RID)	80
Tunnel restriction code	(E)
14.7. Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code	
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code	No information required.
SECTION 15: Regulatory infor	mation
	an a

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

National regulations	The Chemicals (Hazard Information and Packaging for Supply) Regulations 2009 (SI 2009 No. 716).
EU legislation	 Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures (as amended). Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) (as amended). This product may impact SEVESO storage regulations.
Guidance	Workplace Exposure Limits EH40.
Water hazard classification	WGK 2

15.2. Chemical safety assessment

No chemical safety assessment has been carried out.

SECTION 16: Other information

Revision comments	NOTE: Lines within the margin indicate significant changes from the previous revision.
Revision date	18/11/2015
Revision	04
Supersedes date	03/06/2015 11322 Approved.
SDS number	11322
SDS status	Approved.
Signature	J Spenceley
Risk phrases in full	 R21/22 Harmful in contact with skin and if swallowed. R22 Harmful if swallowed. R26 Very toxic by inhalation. R34 Causes burns. R37 Irritating to respiratory system. R43 May cause sensitisation by skin contact. R51/53 Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment. R62 Possible risk of impaired fertility.
Hazard statements in full	 H302 Harmful if swallowed. H312 Harmful in contact with skin. H314 Causes severe skin burns and eye damage. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H330 Fatal if inhaled. H335 May cause respiratory irritation. H361f Suspected of damaging fertility. H411 Toxic to aquatic life with long lasting effects.
